The next must-have "toy" for Grown-ups

Luxury Toys: Don't you just love it when you have something cooler than all your friends? And I'm not talking about when we were kids. As mature and well-balanced as we claim to be as adults, we all get that feeling of satisfaction when people praise us for our "stuff." Here's one more for your ego: a high-end, fully-customized arcade. And you thought your new 62" plasma was cool? Each arcade cabinet is fully customizable and custom made, allowing the customer to have complete control.

DreamAuthentics systems can store as many as 5,000 classic and current video games, along with a variety of game controls that deliver an authentic arcade experience. Each gaming system can play DVDs and audio files, sports a hookup for cable and internet access, a custom computer platform, and an arcade audio system with subwoofer. This is no do-it-yourself kit. You couldn't put this together if you tried - it's that customized. So, even if you can't boast to have built it yourself (well, we'll leave the fibbing up to you), you can still wow your friends with one cool hunk of machinery with either a 27" or 33" arcade monitor and custom marquee - yeah that's your name in lights. Visit www.DreamAuthentics.com.
